Amazing

Setup

Place the game board on the table. Each player chooses a pawn and places it in a space of their choosing. Shuffle the cards and lay out 3 cards beside the game board picture side up. Place the deck next to them. The player who last travelled outside their hometown starts!

How to play

The 3 laid-out cards are available, and the top card of the deck will become available soon. When in turn, consider the available cards and their locations. Roll the die and move your pawn towards the location you want to reach, or stay where you are.

If the die shows:

 You can move your pawn across one border or along a trail over water.

 You can move your pawn across 2 borders or trails.

 You can move your pawn across 3 borders or trails.

 Choose any available card, and place it on the bottom of the deck. The next card becomes available instead, and you get to go again!

Movement is only allowed along trails over the water and over common borders between two areas, so no diagonal moves from corner to corner.

If you reach one of the available locations, you can stop there and ask to hear the question. The player to your left picks the card up, and keeps the text side hidden from all other players. They show you the image and reads out the question and answer options.

- If you answer the question correctly, you get the card. The next card becomes available instead.
- If you answer wrong, the reader of the card **does not reveal** the correct answer! The card goes back to the table, but the top card from the deck is placed on top of it! The bottom card will become available again when the cards above it have been collected. **Note!** The reader probably can remember the answer to the question, and can more easily collect the card on a future round.

Special move

If a player has 2 extra cards of a specific category, they can use them to move instead of rolling the die. They return those 2 cards to the bottom of the deck and move their pawn to any space on the board!

End of the game and winning

The game ends when one of the players holds at least 1 card from each of the 5 categories. That player is the winner and the biggest Britain expert of the group!
